- Behavior management
- Developmental screenings
- Family services
- High risk intervention
- Medication and monitoring

*Celebrating **60 Years** of Serving Children  
and Families in New Hanover, Brunswick, and  
Pender Counties!*

## Our Mission

Our mission is to prepare preschool children for kindergarten. Children develop at different rates, and some exhibit delays in areas such as speech, learning, motor, or social skills.

The Child Development Center supports inclusivity, offering "the least restrictive environment" to help children with and without developmental delays develop independence and prepare for kindergarten.

## Education Services

CDC offers a variety of education services tailored to each child's needs. Whether the child is a typically developing child or a child with special educational or medical needs, our staff works with each child's parents and local school system to help the child reach his or her full potential during the preschool years. Our program emphasizes communication, socialization, adaptive behavior, and cognitive development to foster academic skills and independence. A low teacher-to-pupil ratio is maintained with an instructional assistant in every classroom.

## Parent Involvement

At CDC, we understand that parents are a child's most important teachers. We encourage parents' input into their children's educational plan and we provide many opportunities for parents to participate in the program.

## Dedicated Staff

Our staff consists of an inter-professional team that includes B-K certified teachers, experienced assistants, and speech, occupational, and physical therapists.
